## WOOLSTON TALKS.

He Says He is Prepared to Furn-

Water if the City Gives Him the Contract.

The Money is Ready for Extending Mains and to Purchase an Un-

He Does Not Think Much of the Lump Gulch Proposition and Makes

Geo. F. Woolston, of water notoriety, returned to Helena yesterday from an extended trip from ocean to ocean. He has come back to observe what action, if any, will be taken by the city council regarding the bid recently submitted by him for sup plying the city with water. Speaking of his consolidation scheme to an INDEPE DENT representative, he said that he had everything in readiness to proceed on a large scale to extend the water service. The consolidation, which includes form large scale to extend the water service. The consolidation, which includes four water companies of Helens, has been capitalized on a basis of \$1.000,000. "This entire sum," said Mr. Woolston, "I have secured through the issuance of bonds and it is our purpose, should we get the contract, to expend every dollar right away for the extension of the service and to purchase a new and unquestioned source. I have no secrets or schemes in this matter, it is a simple business proposition." Regarding the new source, he said he could not tell where it is at present on account of obstacies that might be thrown in his patd when the time comes to purchase it, but he would not hesitate to say that it will furnish a great deal more water than any of the sources of supply unpopularity in that section of the United States where he is best known. Of course Harrison had to have the help of republicans in his own state, and the number of offices he has given these people since March 4, is proof that they served him last year not for love of him but for places promised in advance.

The republican party has found out that it was led by false representations to nominate a man for whom it never did and never will care one red cent. The signs of dissatisfaction are more abundant among the politicians. The party was imposed upon last year, it gained almost nothing by it and it is sore over the result. certain that I can do what I shall claim to do," continued Mr. Wool ston, "and we are starting out on a basis to supply a city of 100,000 or 300,-000 people, and we shall guarantee to lay pipe all in good order and have every portion of the city safe from fire before January I."

hausted his new, but yet unknown source, he said, will furnish eight or ten times as much water outside and apart from the four companies now furnishing water to the city and which are in the consolidation. He then spoke of cities which owned their water supply and cited Spokane Falls, which had what was supposed to be an excellent service, but he thought the great difficulty to be met with was that a city could not secure money fast enough to extend their works, and then if a calamity should overcome the city, such as was witnessed at Spokane Falls, there is nobody to whom the blame could be attached. He further stated that the reports being sent out about Helena's poor condition toghight fire were doing damage to the town, and it will be difficult to secure money for any public enterprise. He said the city was not in a dangerous condition, and all that is required at this time is additional apparatus and a good paid department.

He did not care to express his origins on usted his new, but yet unknown source,

DEMOCRATIC PRIMARIES.

REFINING COPPER

The Anaconda Will Build a Refinery Ne Three Forks.

It is now stated on good authority that the Anaconda company will erect its copper refinery, to be of the new electric process, near Three Forks, at the junction of the Jefferson and Madison rivers. Marcus Daly recently bonded a tract of land there about two miles square, from the English syndicate which bought a large tract of land around Three Forks several years ago. Mr. Hunter, the syndicate's agent, recently went to England to secure the necessary deeds to make the transfer. The amount of the bond is not publicly stated, but the sale will involve several hundr thousand dollars.

The electric copper refinery to be built will be a mammoth enterprise, giving employment to a sufficient number of people to support a town of at least 2,000 people, and as it will be tributary to Helena the benefits accruing from a business standpoint are apparent. Water power and plenty of it is a necessary adjunct to such works, as it is proposed to establish, and after careful investigation the Anaconda company has decided upon the site where the Jefferson and Madison rivers meet as the most suitable location for the neet as the most suitable location for the At present nearly all the copper matte manufactured at the smelters of this com-pany is sent to Swensea, Wales, for refine-
